**To Whom It May Concern**

Dear Sir

**RE: UNIVERSAL LIFTING & MOVING SERVICES, HULL**

We have been associated with ULMS and in particular Ian Kavanagh for many years. We have found that not only do we not need to worry on how they execute Lift and Shift work on our behalf, but we also know that they will carry out the work in a controlled and safe manner.

During our association they have had an exemplary Safety record with no reportable accidents which reflects well for us as a company. All paper work including mechanical handling certificates, Risk Assessments and Method Statements are in place and it with this in mind that we do not consider any other company for this type of work as we know that their rates are competitive.

At a time when we are first to criticise poor service, we have pleasure in recommending ULMS as a professional sound company.

Without hesitation, please feel free to contact us if you would like any additional information.

Yours Faithfully  
for EJM Engineered Systems Ltd
